Problem: Northerns in Long Lake, Fond Du Lac County.

There is an abundance of undersize Northerns in the lake. The Long lake Fishing club, with support from the local DNR fisheries manager, propose to eliminate the size limit ,but retain the bag limit. In doing so we are hoping that harvesting of these undersize Northerns will make a better fishery for all species.

Be it resolved the Conservation Congress at its annual meeting held in Milwaukee Co. April 10th, 2006 recommend that the DNR take action to eliminate the size limit on Northerns in Long Lake.
